

SmartNOTAM for General Aviation (GA)

In addition to the standard NOTAM, Skyguide AIM services offers the unique product SmartNOTAM, which provides an added value to you as a pilot. Below you will find an overview how SmartNOTAM can improve your flight preparation.

The SmartNOTAM **features** at a glance:

- ✓ Designed to deliver only significant NOTAM for an individual flight.
- ✓ Tailored to enable safer operations.
- ✓ Significantly less NOTAM without losing operational relevant NOTAM.
- ✓ Revised NOTAM text with proper ICAO abbreviations for a better readability.
- ✓ Time based filtering according to NOTAM time schedule (Item D).
- ✓ Unclear NOTAM content clarification with the NOTAM originator.

What is the difference between original NOTAM and SmartNOTAM?

SmartNOTAM are individually screened and processed to customer specific, operational requirements. The text of a SmartNOTAM is revised to improve readability and reduced to contain only text of operational relevance. The result is a short, clear and unambiguous NOTAM text. Furthermore, the SmartNOTAM only appears in the briefing period in which it is valid.

Which SmartNOTAM profiles are available for General Aviation?

"General Aviation IFR low" covers:

- 800 aerodromes within Integrated Initial Flight Plan Processing System Zone (IFPZ) = Europe, Ukraine and Armenia
- All FIR specific NOTAM within the above mentioned IFPZ region
- SNOWTAM/ASHTAM within the above mentioned IFPZ region

"General Aviation VFR low" covers:

- Aerodromes in Switzerland, Germany, Italy, France and Austria on which VFR flights area authorized
- All FIR specific NOTAM for Switzerland and bordering countries
- SNOWTAM and ASHTAM
